HIGHLIGHTS

- Developed the core **CGI Transcend® child support intake intellectual property** using **Salesforce Omnistudio**, creating an intuitive, step-by-step interactive wizard that serves as the reusable baseline for **state-level implementations**
- Led a **Roadshow demonstration** for up to **150 Texas Department of Licensing & Regulation stakeholders**, presenting sprint-over-sprint progress of a **Salesforce Experience Cloud licensing portal** featuring dynamic user routing logic for both authenticated and guest applicants
- Selected as a **specialized technical lead** during a critical stabilization phase for the Texas Department of Licensing & Regulation, entrusted to **triage and debug complex UAT defects** for a system issuing up to **960k licenses annually**, directly **unblocking client testing** and ensuring system readiness

EXPERIENCE

CGI | *Global IT business & consulting firm*

JUNE 2021 - FEB 2026

Senior Salesforce Consultant

- Delivered customer-facing Salesforce Experience Cloud and Omnistudio solutions for state agencies, replacing legacy workflows with scalable portals and guided digital intake experiences supporting high-volume public sector programs
- Engineered complex Omnistudio solutions including Omniscripts, Flexcards, Data Mappers, and Integration Procedures to translate business requirements into intuitive, maintainable workflows for applicants, caseworkers, and internal users
- Partnered with client stakeholders, QA teams, business analysts, and technical teams to investigate issues, clarify expected behavior, reproduce defects, and deliver practical fixes across UAT and production support phases
- Performed root cause analysis and defect triage across Salesforce configuration, Omnistudio components, data mappings, user permissions, and deployment changes to unblock testing and stabilize mission-critical systems
- Designed scalable Salesforce object models, validation logic, automation patterns, and least-privilege access controls to support data quality, audit readiness, and secure handling of sensitive PII
- Executed CI/CD workflows using Copado and Azure DevOps, performing metadata packaging, conflict resolution, deployment validation, and post-release checks to protect production stability

Sense Corp (acquired by CGI) | *Boutique consulting firm*

APR 2020 - JUNE 2021

Salesforce Consultant

- Executed core Salesforce configuration including data modeling, security, automation, and user access controls across successive client engagements
- Translated raw business requirements into functional user stories, scalable system features, and configurable Salesforce solutions aligned to stakeholder needs
- Built actionable Dashboards and Reports that provided leadership with real-time visibility into key performance indicators, turning raw system data into useful operational insight

Dealer.com | *Automotive digital marketing platform for car dealerships*

OCT 2014 - DEC 2019

Implementation Project Lead

- Orchestrated hundreds of enterprise website builds and data migrations over a 5-year tenure, aligning DevOps and Engineering teams to deliver seamless, zero-downtime launches
- Led the platform upgrade for the Ford Elite Plus and Ford OEM Retail program for a top-ranked global dealership, managing VIP client relationships to execute a seamless go-live
- Managed a team of 10 contractors and created clear quality checks to ensure data accuracy across multiple simultaneous migrations

CERTIFICATIONS
