LICENSES A YEAR, TEXAS LICENSING	VIRGINIA CHILD SUPPORT MODERNIZATION	CHILD SUPPORT CASES A YEAR	SWIFTPASS FEATURES AND FIXES SHIPPED

EXPERIENCE

PROTOPIXEL · Freelance Developer, SwiftPass

MAR 2026 – PRESENT

- Scoped and shipped 10 features and fixes on SwiftPass, a passport and visa portal (Next.js, React, TypeScript, Supabase), with PRs reviewed and merged by the project architect.
- Wrote a Linear spec for every change, drove implementation through Claude Code and Codex, and verified the real flow in the browser for each affected role before opening a PR.
- Closed a duplicate-application race condition with a PostgreSQL partial unique index and fixed full-admin document downloads on stale profile paths, backed by regression tests.

CGI · Senior Salesforce Consultant

JUN 2021 – FEB 2026

- **Texas Department of Licensing & Regulation:** Omnistudio Solution Architect and one of three Scrum Leads, designing guided licensing workflows and Experience Cloud registration and post-login routing for a system issuing up to 960k licenses a year. Presented the opening Roadshow demo to roughly 150 stakeholders.
- Helped facilitate the TDLR UAT stabilization with the other two Scrum Leads, coordinating 5+ engineers through 30+ complex defects and personally fixing the most complicated Omniscript ones; UAT resumed on schedule.
- **Virginia child support:** joined from the start of a 7-year, $83M modernization replacing a 29-year-old mainframe; owned the data architecture, built guided Omnistudio forms and Experience Cloud self-service components, and supported CI/CD through Copado for up to 275k cases a year.
- **CGI Transcend®:** extended CGI's Salesforce case management product for child support, owning the data architecture and building AppExchange packages reused across states; helped design role-based access protecting PII on Transcend and Virginia.
- **Ohio Development and Massachusetts Education:** owned the data architecture and built Flexcards, Omniscripts, Data Mappers, and Integration Procedures; in Ohio, consolidated multiple legacy grants systems into one Salesforce instance.
- **Ohio Developmental Disabilities:** staffed from the very start, helped establish the platform and Individual Service Plan rollout with guided Omnistudio flows for up to 90k individuals, then selected as 1 of 2 to roll the org into Managed Services.

SENSE CORP · Salesforce Consultant (acquired by CGI)

APR 2020 – JUN 2021

- Began the Ohio Developmental Disabilities implementation in August 2020, after supporting data architecture, security configuration, and release testing for Oklahoma Adult Protective Services as a Salesforce Technical Analyst.

DEALER.COM · Implementation Project Lead (Cox Automotive)

OCT 2014 – DEC 2019

- Delivered roughly 300 enterprise website implementations over five years, carrying 20 to 30 dealer accounts at once through 60 to 90 day builds with zero-downtime launches.
- Led the Ford Elite Plus and Ford OEM Retail platform upgrade for a top-ranked global dealership and managed a team of up to 10 contractors.
